

# Relocation Budget Planner

One of the best ways to minimize the out-of-pocket expenses during your move is to set up a budget. Budgeting is essential to limiting your expenses and tracking your benefits and entitlements. The Relocation Budget Planner is one of tools you can use to keep on track throughout your move. If you need assistance, contact your Military and Family Support Center or Military OneSource (<http://www.militaryonesource.mil>).

Enter your estimated benefits and entitlements in the first column (Benefits due you). Enter your estimated total cost for each item in the middle column (Your total estimated cost). Calculate the difference between the first column and the middle column, and put the number in the third column (Difference). If that number is negative, you may incur out-of-pocket expenses. Knowing this in advance can help you reduce your estimated costs and plan for extra expenses.

Keep your Relocation Budget Planner current as estimates change or become actual costs. This will help you stay on top of your relocation finances. You also may want to keep track of these costs for tax purposes or reimbursement for a personally procured move.
